

# WIDEX DREAM™

TRUE TO LIFE SOUND

[www.widex.com](http://www.widex.com)

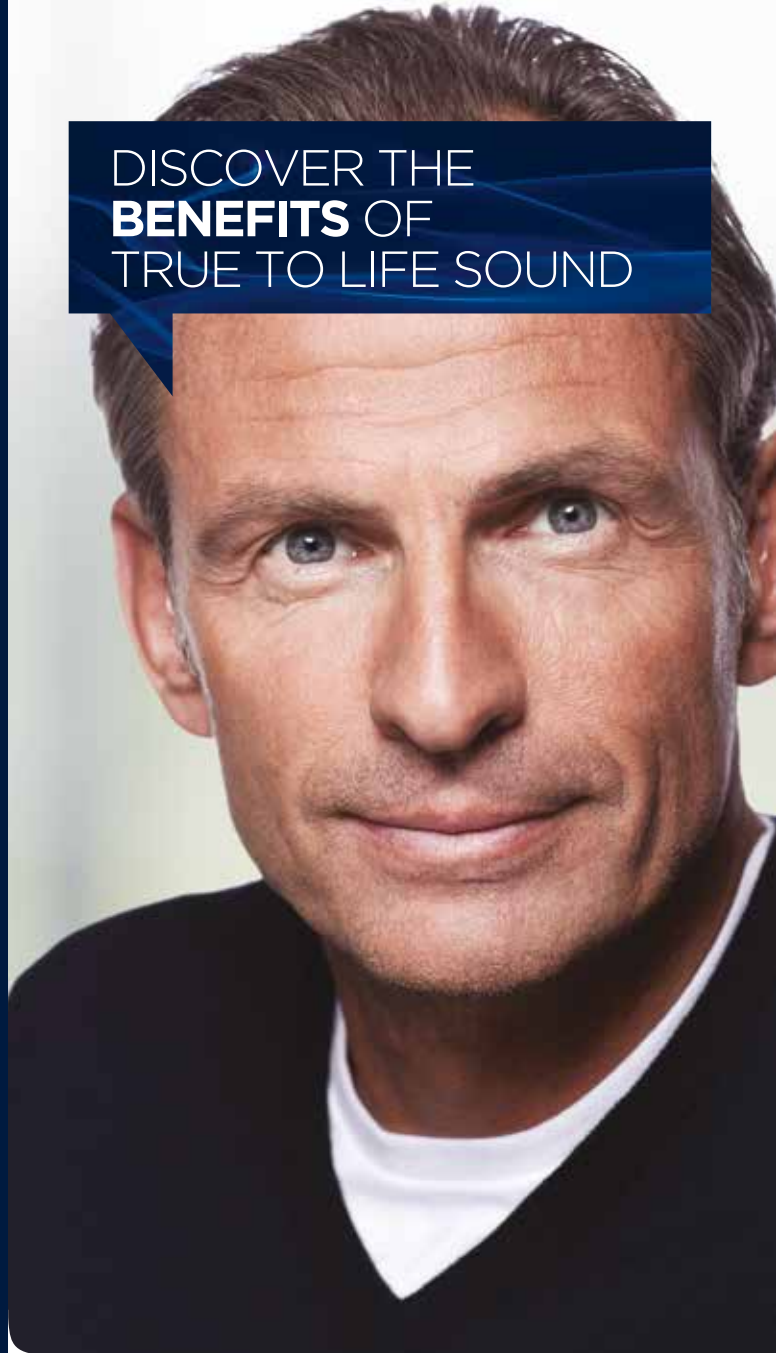

Widex hearing instruments may not provide the same benefits to all users, and may not be appropriate for everyone with a hearing loss. Your authorized Widex dispenser will evaluate your hearing loss (and may charge a fee for this evaluation) to determine if Widex hearing instruments can help you. Your success with Widex hearing instruments depends upon a competent examination, proper fitting and your ability to adapt to using a hearing instrument.

## WIDEX DREAM™

TRUE TO LIFE SOUND

MORE SOUND

MORE WORDS

MORE PERSONAL

MANY HEARING  
AIDS CAN IMPROVE  
YOUR HEARING.

AN **EXCEPTIONAL**  
ONE GIVES YOU  
**TRUE TO LIFE**  
**SOUND.**

## WIDEX **DREAM™**

The DREAM by Widex, one of the most technologically advanced hearing aid manufacturers in the world, provides more sound, more words and a more personal experience.

With the DREAM series, sounds will seem richer, with greater depth, dimension and detail. Speech will be clear through the use of our unique True-Input Technology™ that preserves the nuances of the human voice, while minimizing background noise in social environments.

Plus, DREAM is highly personal, with nine different models in 15 colors. Pair that with a comfortable fit that suits your lifestyle and budget with help from your Hearing Healthcare Professional, and you'll see why DREAM is a dream come true for many with hearing loss.

**Call your Hearing Healthcare Professional today and ask about the true to life sound of DREAM.**

## DREAMING OF A BETTER SOLUTION

### **Do you want to hear what everyone else does?**

Widex DREAM uses True-Input Technology, which maintains the fidelity of sounds and creates a broader, deeper soundscape than you may even remember. Your hearing experience will be clear, rich and full, even in high-noise environments like concerts, parties or sporting events.

### **Is conversation without struggling to hear important to you?**

Being able to communicate and understand speech clearly is something you should never have to compromise. Widex DREAM's special features are designed to help ensure your friends and family are heard, with InterEar™ Speech Enhancer, High Definition Locator and compression systems that more effectively select the best setting for speech understanding.

### **Are you having trouble hearing high-pitched sounds, like a young child's voice, birds chirping, or the beeps of kitchen appliances?**

The Audibility Extender for DREAM hearing aids may help. With this feature, you'll be able to hear sounds you may not have heard in years.

### **Do you want a discreet and efficient hearing device?**

Widex DREAM devices are small and comfortable, and the POWERSAVER™ design uses 20 percent less power and offers an extended battery life.

**DREAM** is available in a variety of models, including a virtually invisible model.

# GET MORE FROM LIFE WITH **DREAM**

## **MORE SOUND**

- True-Input Technology creates a broader, richer soundscape
- Background noise is minimized for better hearing in noisy environments
- TRUE Integrated Signal Processing™ platform preserves sound's fine details, without the echo
- InterEar seamlessly synchronizes both hearing aids for natural sound
- Processing channels result in more precise hearing

## **MORE WORDS**

- HD Locator makes it easier to understand spoken words
- Channel-specific directionality for speech emphasis
- Speech Enhancer SII enhances the dominant voice in a crowd
- Enhanced Dynamic Range Compression works to allow soft sounds, like whispers, to be heard clearly
- Programs work together to self-select the best options for your environment

## **MORE PERSONAL**

- DREAM is available in a variety of technology levels and styles to best fit the personal needs of each individual
- Personalized ZEN Program to help manage tinnitus

Features are dependent upon technology level. Ask your Hearing Healthcare Professional for details.

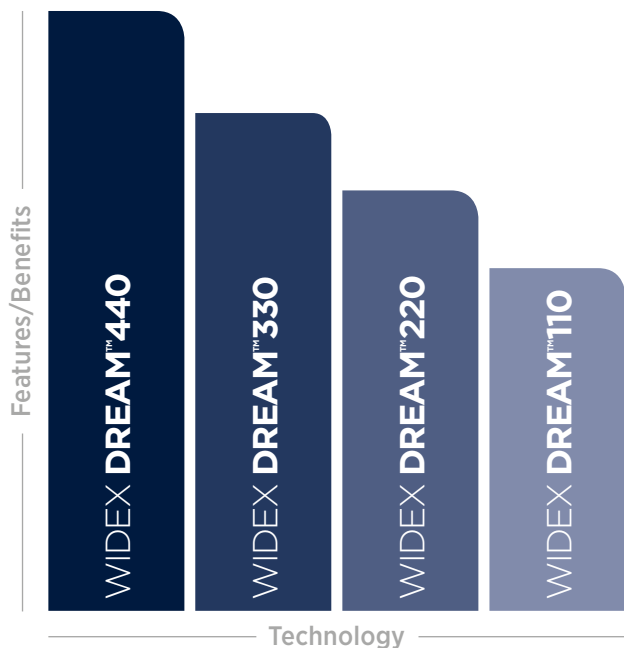

# HEARING AID MODELS AND COLORS

The Widex DREAM series is available in a range of Behind-The-Ear (BTE) models and In-The-Ear (ITE) models.

Your Hearing Healthcare Professional can help you choose the right option for your specific hearing loss.

The DREAM family of hearing instruments also offers a complete selection of hearing solutions with four available levels of features and technology.

All BTE models are available in our six standard colors.

Standard BTE colors	
	Warm beige
	Midnight black
	Tan silk
	Titan grey
	Cappuccino brown
	Winter silver

PASSION, FUSION, FASHION and FASHION POWER are available in these additional colors as vibrant as your personality.

Additional BTE colors	
	Summer gold
	Shocking pink
	Copper brown
	Lime green
	Pearl white
	Sporty red
	Metallic blue
	Mediterranean turquoise
	Silver white*

Our discreet ITE and Completely-In-Canal (CIC) models are available in the following colors.

Standard ITE/CIC colors	
	Beige
	Dark brown
	Medium brown

\*Only available in FASHION POWER.

## FIND ZEN WITH DREAM

Tinnitus, a distracting ringing or buzzing in the ears, affects an estimated 50 million Americans, 90 percent of whom also report some hearing loss.\*

With DREAM, you can combat both conditions with one device. Available only in Widex instruments, our exclusive ZEN Program has shown great promise in a clinical study\*\* in the fight against tinnitus. Using a range of random, relaxing harmonic tones, it works to make the sounds of tinnitus less noticeable so that you can focus on the sounds that matter.

If you have or think you have tinnitus, you should be evaluated to determine your options for managing it. Your chances of success are increased when you work with an experienced Hearing Healthcare Professional trained in managing tinnitus. DREAM with ZEN may be the solution you have been looking for.

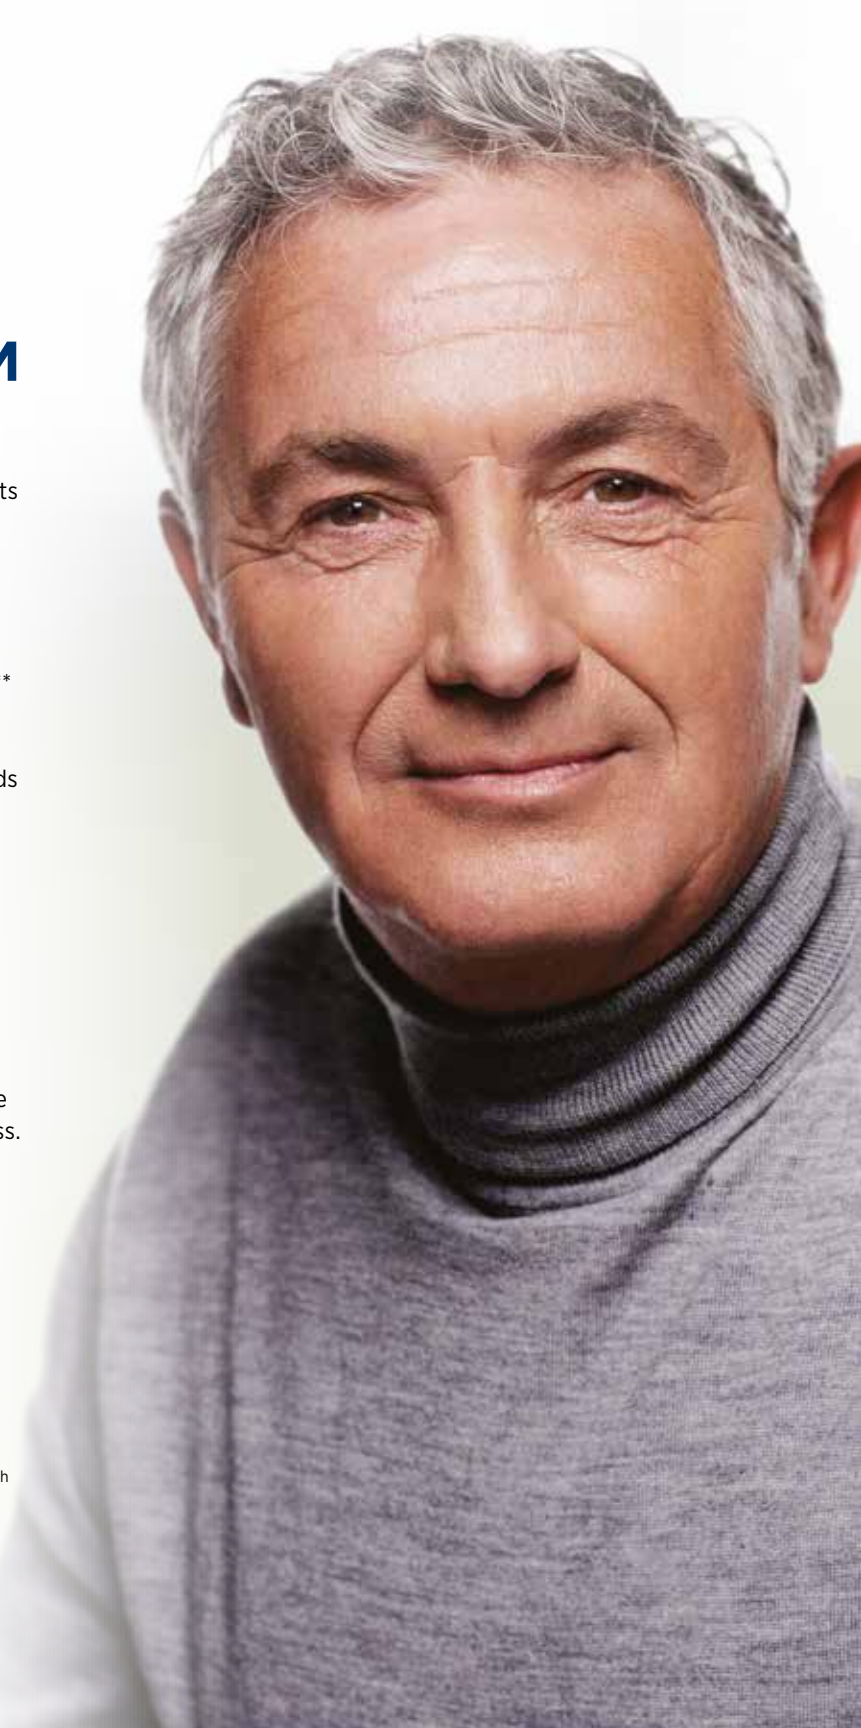

Your Hearing Healthcare Professional can help you choose the perfect hearing aid model for your specific hearing loss.

**Call your Hearing Healthcare Professional today and ask about the true to life sound of DREAM.**

\*American Tinnitus Association

\*\*Sweetow, RW and Sabes, JH (2010). Effects of Acoustical Stimuli Delivered through Hearing Aids on Tinnitus. *Journal of the American Academy of Audiology*, 21(7), 461-473.

**Indications for Use:** The ZEN Program is intended to provide a relaxing sound background for adults (21 years and older) who desire to listen to such a background in quiet. It may be used as a sound therapy tool in a tinnitus treatment program that is prescribed by a licensed hearing healthcare professional (audiologists, hearing aid specialists, otolaryngologists) who is trained in tinnitus management.

# DEX ASSISTIVE LISTENING DEVICES

## COM-DEX

A true hands-free device for streaming high-quality sound from any mobile phone to hearing aids. Can be combined with the COM-DEX app for convenient control of hearing aid volume, sound direction and program settings.

## COM-DEX REMOTE MIC

COM-DEX Remote Mic is a stylish add-on to your COM-DEX solution and is the answer to difficult one-on-one situations where clarity of speech is essential.

## RC-DEX

A stylish, compact and user-friendly remote control that gives users better control of selected hearing aid functions. Allows the user to adjust volume and change between programs quickly and discreetly. Small enough to fit on a key ring. A lock switch prevents the remote from being activated accidentally.

## TV-DEX

A palm-sized, user-friendly wireless listening device built for streaming TV and audio to your hearing aids, TV-DEX allows up to 10 hours of uninterrupted stereo TV or hi-fi sound between recharges.

## PHONE-DEX

An all-purpose, cordless phone that streams crystal clear sound directly to your hearing aids. Provides the best possible listening experience for the user — without using a telecoil program or streamer. Also works as a conventional phone.

## UNI-DEX

The UNI-DEX is a neck-worn plug and play solution for easy mobile phone use. The built-in microphone in UNI-DEX allows you to talk hands-free when using a mobile or Skype via PC or tablet.

## CALL-DEX

An ultra-compact device for automatically streaming conversations from mobile phones to hearing aids, CALL-DEX simply inserts into the jack plug of your phone — no neck loop needed. CALL-DEX lets you stream up to 80 hours and is compatible with most mobile phones.

## FM+DEX

The FM+DEX is a high-quality streaming device that converts signals from an FM receiver, telecoil or line-in and streams it to your hearing aids. With 10 hours streaming and easy-to-use toggle, FM+DEX is ideal for the classroom, meetings, lectures and concerts.
